

## *“The Builders of Living Systems”*

Eco Constructions was established in 1988 and is based in Broome. We specialise in providing sustainable living systems and work places suited to tropical living

Residential Homes

Commercial Projects

Tourist Developments

Eco Cabins

Structures are computer designed and engineered for ease of erection.

Open plan living and entertaining areas with generous deck space.

Elevated ceilings to promote airflow.

Large overhanging eaves to keep your house cool.

The use of plantation or recycled materials wherever possible to minimise the use of rainforest timbers

*“Choose a space under the open sky and Eco Constructions will make it your own. In a chaotic world Eco lets you create an environment that is not limited by walls, but defined by a sense of your own space, a unique place with tranquility, relaxation and freedom*

*We believe the outside is an extension of your home, an expression of your individual style, every bit as important as any other room in your home which is finished with your own unique ideas and styles and bringing your outside and inside life as one. “*
